

Amendments to the Claims

1 Claim 1 (currently amended): A method of selectively subscribing to content in a computing
2 environment, comprising steps of:

3 enabling a user to identify, from a rendered view of content, a portion of the content
4 which is of interest to the user, wherein a ~~provider~~ renderer of the view of the content has not
5 provided a subscription interface thereto; and

6 registering a subscription, for the user, to the identified portion of the content.

1 Claim 2 (currently amended): The method according to Claim 1, further comprising ~~the step of~~:

2 using the registered subscription to deliver updates of the identified portion of the content
3 to the user.

1 Claim 3 (currently amended): The method according to Claim 1, further comprising ~~the step of~~:

2 enabling the user to customize the ~~identification~~ subscription to specify such that at least
3 one condition which must be matched before the user is interested in the identified ~~is placed on at~~
4 ~~least one~~ portion of the identified content, wherein the ~~at least one~~ portion may comprise the
5 identified content in its entirety and wherein the content provider may have provided the
6 subscription interface to the identified content but has not provided a subscription interface using
7 all of the conditions and/or all of the portions; and

8 wherein the registering ~~[[step]]~~ further comprises registering the customization.

1 Claim 4 (currently amended): The method according to Claim 3, further comprising ~~the step of~~:

2 using the registered subscription to deliver ~~updates~~ an update of the identified portion of
3 the content which match the ~~conditions~~ at least one condition to the user.

1 Claim 5 (currently amended): The method according to Claim 3, further comprising ~~the steps of:~~
2 specifying, for the user, at least one action to be carried out when the at least one
3 condition is ~~conditions are matched in~~ updates ~~an update~~ of the identified portion of the content.

1 Claim 6 (currently amended): The method according to Claim 5, further comprising ~~the step of:~~
2 evaluating the registered subscription, and if the at least one condition registered
3 condition(s) therein ~~[[are]]~~ is met in an update ~~updates~~ to the identified portion of the content,
4 carrying out the ~~action(s)~~ at least one action.

Claims 7 - 11 (canceled)

1 Claim 12 (currently amended): The ~~computer program product~~ method according to Claim ~~[[10]]~~
2 1, wherein the ~~computer-readable program code means for~~ the enabling receiving and ~~computer-~~
3 ~~readable program code means for~~ the registering are adapted for receiving identifications enabling
4 ~~of content of interest to a plurality of users~~ to identify the portion of the content which is of
5 interest to each of the plurality of users and registering ~~subscriptions to updates~~ the subscription
6 to ~~[[of]]~~ the identified portion of the content ~~[[of]]~~ for each of the plurality of users, respectively.
